

How to Use...

Pages can be compiled in a vocabulary binder, or students can cut around rectangle and glue into a notebook/interactive notebook for study.

There are 5 components of this activity:

1. Whole group copies definition from teacher and discuss it. Class determines part of speech. This is on the left side of the paper.

2. Students independently draw a quick symbol reminding them of the word.

3. Students share symbol with partner.

4. Teacher picks about 3-4 students to share out with class, describing their symbol/illustration.

5. Class comes up with a motion to demonstrate the word.

This is based on Robert J. Marzano's research and practices in student vocabulary development.
